25X1

1. On 25 October 1953, a flag was put up at the southeast end of the Bechyne Airfield runway to indicate the completion of work on the runway.
2. Two large hangars were under construction in the southeast corner of the wood which lies north of the Bechyne Airfield area. The western hangar was nearly finished, while the other had only been begun. The only other work which was going on was the clearing of rubbish at the ends of the runway. The field can be considered to be practically completed.
3. The runway is 2,200 meters long and 90 meters wide; it runs 125° and 350°. An apron runs parallel with the runway and 400 meters northeast of it, and there are four taxiways connecting the two.
4. The field is 435 meters above sea level and its geographical coordinates are 49° 16' 20" N. and 14° 30' 10" E.
5. A railroad spur line is connected with the field.
